

Fortuna Artist Canvas 380

■ glossy 3582 - 380 g/m²

Artist quality, real polyester/cotton canvas with a 2:1 weave structure for highest print quality expectations. The water-resistant coating allows a huge colour gamut and deep print densities. For longlasting applications, good results are achieved with most common, pigmented waterbased inks. The canvas can be framed, mounted or sewn. Due to its 2:1-weave and the high flexibility, the product is resistant to edge cracking when mounted on a wooden frame.

Applications

- Indoor signs
- Indoor promotions
- Framed art

Advantages

- Real polyester/cotton canvas (2:1 structure)
- Huge colour gamut and deep print densities
- High flexibility
- Resistant against cracking
- Good dimensional stability

Fortuna Artist Canvas 380

■ glossy 3582 - 380 g/m²

Physical Properties

Test Conditions	23°C / 50% R.F:	
Weight	380 g/m ²	ISO 536
Thickness	475 µm	ISO 534
Canvas Structure	2:1	Visual
Whiteness	85	Wcie

Recommended use and storage

The converting and storage should take place in a climate of 35 to 65% relative humidity at temperatures between 10 and 30°C. Due to the natural components of the material it tends to curl when relative humidity is fairly high, which can cause print head damage. We recommend that the material is first removed from original packaging when printing commences!. After the printing process put the media back in its original packaging. Cotton gloves are allways recommended when handling InkJet coated materials to avoid fingerprints.

The values provided on this datasheet are only for orientation.

Before using our media please check its compatibility for your printer and intended application. Technical specifications are subject to change, therefore we do not take responsibility for any misprints resulting from technically modified inks and/ or printers. 04.06.2012
